

E.SCAPE LANDSCAPE CONSTRUCTION SOLUTIONS

AN INCREDIBLE ENTERTAINER

THE WHOLE FAMILY CAN ENJOY

Set on a quarter acre in Brighton, this beautiful outdoor space was designed by Faulkner & Chapman Landscape Design and constructed by e.Scape Landscape Construction Solutions.

The brief was to create a functional and practical outdoor area the entire family could enjoy all year round, which is exactly what the team at e.Scape Landscape Construction Solutions delivered.

The alfresco area features an electric louvre roof system, in-built heating, stainless steel streamlined drainage and an in-built barbecue with cabinetry, which combine to create the ideal space for entertaining.

The design features Blizzard granite pavers with an 80mm drop face from Phoenix Stone, which greatly enhance the contemporary aesthetic of the space.

Located in Noble Park, Phoenix Stone supplies landscapers and pool builders with the highest-quality natural stone pavers, which can be custom-made to suit your individual taste.

The sloping block posed a unique challenge to e.Scape Landscape Construction Solutions, which they overcame with the use of retaining walls throughout, to ensure the area was level. The existing pool's size and depth also made the renovation difficult, but the company's extensive knowledge in pool and landscape construction allowed the project to run smoothly.

Eugene Bouchaud and Robert Turnbull established e.Scape Landscape Construction Solutions eight years ago and work predominantly in Melbourne's bayside suburbs, including Port Phillip and the Mornington Peninsula.

The company completes around 14 projects per year and specialises in pool renovations, landscape construction and decking. The talented team will tailor any project to meet the needs of the homeowner.

e.Scape Landscape Construction Solutions prides itself on high-quality service and impeccable attention to detail. By utilising their extensive landscaping knowledge, the team takes a hands-on approach to develop an in-depth relationship with the client throughout the entire process, from project planning right through to completion.
